

The Big Picture: The Equipment Supplier Journey

Figma Design Flow:

Phase 1: The Onboarding Flow (The "Asset Owner" Profile)

This phase mirrors the 5-screen flow from the document.

Stage 1.1: Account Creation & KYC (Screen 1)

- **Objective:** Verify the supplier's identity to build trust and comply with regulations.

- **Figma UI Elements:**

- **Input Fields:** Full Name, Company Name, Business Phone (with country code), Business Email.

- **Verification Module:** A clear button for "Send OTP." Display a field for the 6-digit code.

- **Visual Cue:** A progress bar at the top (e.g., "Step 1 of 5").

Stage 1.2: Location & Operations (Screen 2)

- **Objective:** Pinpoint the yard location to match with nearby miners and logistics partners.

- **Figma UI Elements:**

- **Dropdown:** Primary Base City (Abuja, Jos, Lafia, Kaduna, Lokoja).

- **Address Field:** Physical Yard Address.

- **Map Integration:** A prominent "Locate Me on Map" button.

Stage 1.3: Asset Details (Screen 3)

- **Objective:** List the available heavy machinery.

- **Figma UI Elements:**

- **Dropdown:** Machine Type (Excavator, Bulldozer, etc.).

- **Inputs:** Brand/Model, Year of Manufacture, Current Engine Hours.

- **Toggle Switch:** "Does this machine come with its own certified operator?" (Important for vetting).

- **Add More Button:** Allow the user to add multiple machines in one session.

Stage 1.4: Document Upload (Screen 4)

- **Objective:** Collect proof of ownership and asset images.

- **Figma UI Elements:**

- **Photo Capture:** Buttons for "Take/Upload Photo" for the Front, Side, and Serial Number plate.

- **Document Upload:** "Upload CAC Certificate / Proof of Purchase" (PDF or Image).
- **Drag-and-Drop Zone:** A visually prominent area for uploads.

Stage 1.5: Submission & Verification (Screen 5)

- **Objective:** Confirm submission and manage the off-line verification process.
- **Figma UI Elements:**
 - **Success Message:** "Thank you for registering! Our field agents in the Jos/Nasarawa hub will contact you within 24 hours..."
 - **Status Display:** Show "Account Pending Verification" on the user's dashboard.

Phase 2: Asset Management & Booking (The Supplier Dashboard)

After onboarding, the supplier lands on their main dashboard.

Stage 2.1: The Dashboard

- **Objective:** Provide a snapshot of the supplier's business.
- **Figma UI Elements:**
 - **KPI Cards:** "Total Machines Listed," "Active Bookings," "Current Earnings," "Pending Escrow."
 - **The "List New Machine" Button:** A prominent CTA to start the listing process (re-using Screen 3 logic).
 - **Active Leases List:** A table showing current bookings (Machine, Miner Name, Lease Period, Next Milestone Date, Status).

Stage 2.2: The Booking Flow

- **Objective:** Manage new rental requests.
- **Figma UI Elements:**
 - **Notification Center:** A bell icon showing "New Booking Request for Caterpillar 320D."
 - **Booking Detail View:**
 - **Miner Details:** Name, location, company.
 - **Contract Details:** Start/End Date, Total Contract Value, Rental Fee Breakdown.
 - **Action Buttons:** "Approve Booking" or "Decline" (with reason).
 - **Equipment Operator Vetting:** Display the operator's info for review (Name, License Category E, Years of Experience).

Phase 3: The Transaction & Payout Flow (Operational Execution)

This is the "Money & Logistics" phase, critical for trust.

Stage 3.1: The Logistics & Insurance Module

- **Objective:** Trigger transport, insurance, and escrow release.
- **Figma UI Elements:**
 - **Dispatch View:** A status bar showing "Escrow Locked" -> "Hauler Dispatched" -> "GIT Insurance Active."
 - **Transit Map:** A small map showing the truck's location via the Electronic Tracking Unit (ETU).
 - **Document Hub:** A single place to access the Interstate Transit Clearance Packet.
- Implementation Logic:
 - API Triggers:
 1. Insurance API: Call the Insurance company's API (Leadway, AXA) to automatically activate the GIT policy.
 2. Logistics API: Send a dispatch notification to the vetted 3PL provider.
 3. Tracker Integration: Integrate the ETU data feed onto the dashboard map.

Stage 3.2: The Payout Milestones (Risk Management)

- **Objective:** Release funds in tranches to prevent mid-lease contract abandonment.
- **Figma UI Elements:**
 - **Financial Dashboard:** A visual breakdown of the escrow account.
 - **Milestone Timeline:** A clear timeline for the 10-day lease.
 - **Milestone 1 (20%):** *Status: Released* (Upon arrival at site).
 - **Milestone 2 (40%):** *Status: Pending* (Release on Day 5).
 - **Milestone 3 (40%):** *Status: Locked* (Release on Day 10).

Summary for Design

Feature	Figma Design Requirement
Supplier Onboarding	A clean, 5-step wizard with map integration.
The Dashboard	An analytics view with KPI cards and a "List New Machine" CTA.
Vetting & Guarantors	Forms for Operator Details and Guarantor Information (Name, Phone, ID).
Escrow & Payouts	A financial breakdown of the 15% / 85% split. A timeline for the 3 milestone payments.
Risk Management	Alerts and status updates for GIT Insurance, Security Escorts, and Transit.
